1. Introduction to Custom Success Page for Magento 2

The module extends features of a default Checkout Success Page. You can easily add a block with a coupon for the next purchase, place a video or picture with 'Thank you!' message, provide information about related goods. It makes the page more helpful for customers, increases their satisfaction of the purchase and enhances loyalty.

Little page changes lead to great sales!

Key features

- Display blocks with related products.
- Static blocks customization with coupons, special offers, and discounts.
- WYSIWYG and HTML-editors for both convenient and advanced blocks management.
- Auto creation of price rules and discount code generation.
- Special variables to display order number and discount code.
- All necessary static blocks are created automatically.
- Full access to handling default Magento success page blocks.

The module provides you with the possibility to customize the success page, display special offers and related products blocks — all on one page with just a few mouse clicks.

With this Magento extension you won't need to contact a developer each time it is required to customize the success page of your website. Every change is feasible using WYSIWYG-editor meaning you can edit the success page of your website as easy as you edit text and add images in MS Office.

2. How to Install Custom Success Page Extension

Magento 2 provides a convenient way to manually install a module via composer. In case you got an extension from a provider like a zip-file, follow [this instruction](#).

Further run the following commands:

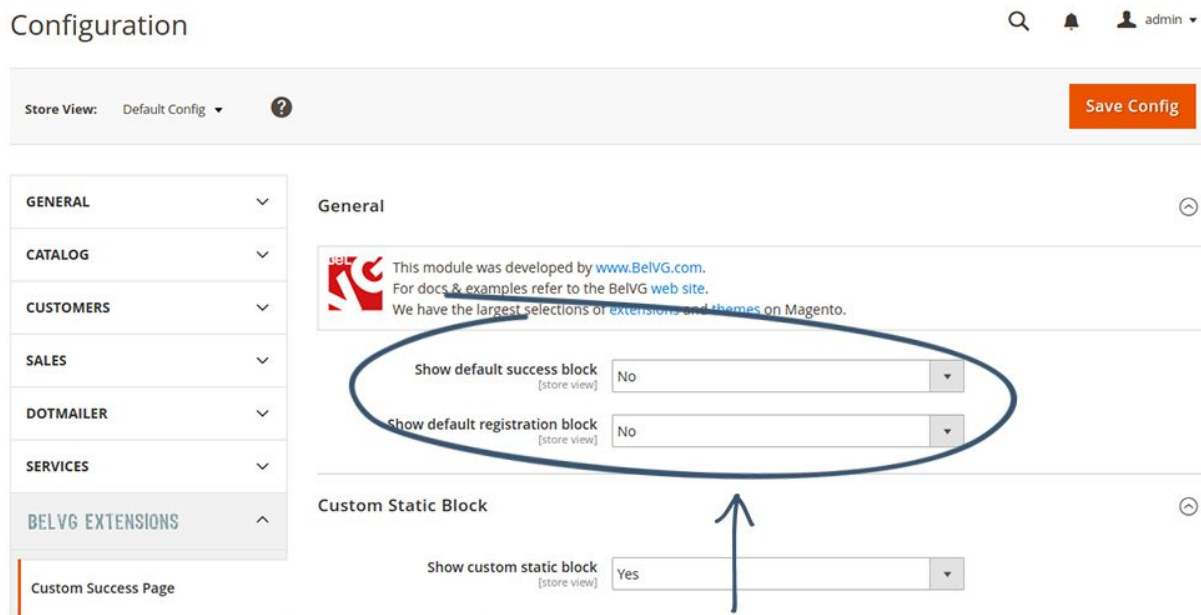

1. Enable module with `php bin/magento module:enable Belvg_ThankYouPage`
2. Run `php bin/magento setup:upgrade`
3. Recompile DI `php bin/magento setup:di:compile`
4. Recompile static files: `php bin/magento setup:static-content:deploy`
5. Flush cache `php bin/magento cache:flush`

3. How to Configure

Note: The extension has been developed and tested only on the Luma and blank Magento themes, so the setting descriptions and screenshots provided in this manual may differ from those you may see if using some custom theme.

Log into the Magento 2 admin panel and switch to **Stores → Configuration**. Under **BELVG EXTENSIONS** find and enter the **Custom Success Page** settings.

You will find the list of options that let you configure and customize the success page to your liking. The first two options are default Magento settings which you have in a store by default.

Turn off the default Magento blocks and use extension features for better customer experience

The Custom Success Page extension adds the following options to your admin panel:

- **Show custom static block:** select Yes to display your custom static block on the success page instead of the Magento default one.

- **Custom static blocks:** in the dropdown list select the name of the block you wish to display on the success page.

Custom Static Block

Show custom static block [store view]

Custom static block [store view]

Please select cms block (use **{{increment_id}}** to display order number in content block)

- **Show cross sell block:** select Yes to display the block with related products on the success page.

Cross sell block

Show cross sell block [store view]

- **Show coupons:** enable this option if you wish to offer customers a special deal or discount.
- **Cart rules for auto-generated coupon codes:** select the type of the rule that will automatically generate coupons for your customers.
- **Custom coupon static block:** select the type of the coupon to be displayed on the success page.

Select cart rule to generate coupon codes

Custom coupon static block [store view]

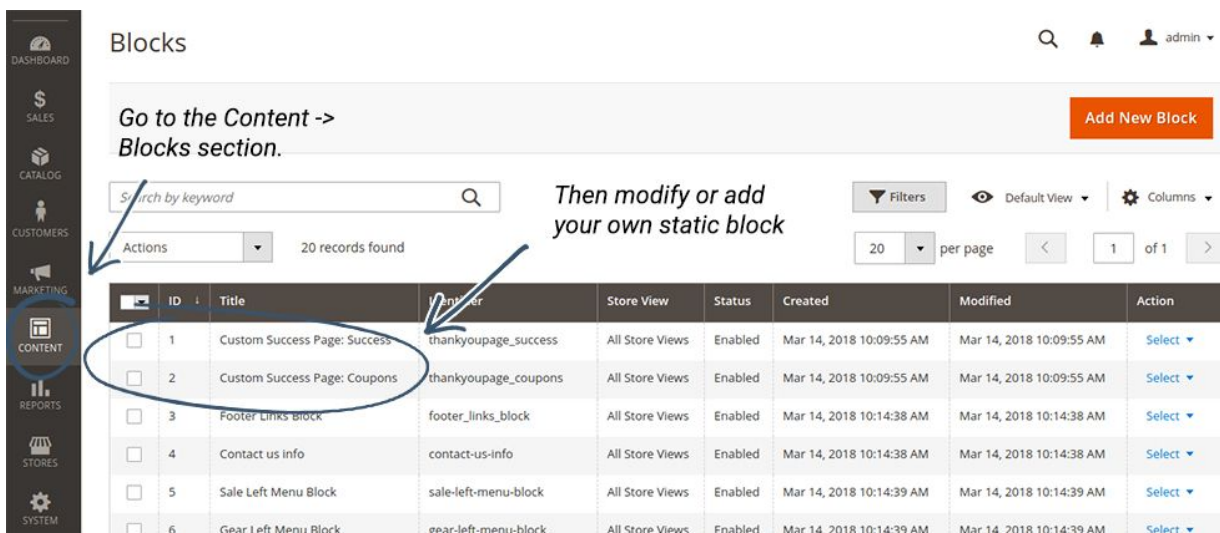

Select cms block (use **{{coupon}}** to display coupon code in content block)

How to customize static blocks

The Success Page module comes with two predefined static blocks: **Custom Success Page: Success** and **Custom Success Page: Coupons**.

You are able to customize and edit these default static blocks or create new ones just to your liking.

To customize a predefined block, switch to the **Content → Blocks** section. In the list of your static blocks you will find the newly added blocks: *Custom Success Page: Success* and *Custom Success Page: Coupons*.

Blocks

Go to the Content -> Blocks section. Add New Block

Search by keyword

ID	Title	Identifier	Store View	Status	Created	Modified	Action
1	Custom Success Page: Success	thankyoupage_success	All Store Views	Enabled	Mar 14, 2018 10:09:55 AM	Mar 14, 2018 10:09:55 AM	Select
2	Custom Success Page: Coupons	thankyoupage_coupons	All Store Views	Enabled	Mar 14, 2018 10:09:55 AM	Mar 14, 2018 10:09:55 AM	Select
3	Footer Links Block	footer_links_block	All Store Views	Enabled	Mar 14, 2018 10:14:38 AM	Mar 14, 2018 10:14:38 AM	Select
4	Contact us info	contact-us-info	All Store Views	Enabled	Mar 14, 2018 10:14:38 AM	Mar 14, 2018 10:14:38 AM	Select
5	Sale Left Menu Block	sale-left-menu-block	All Store Views	Enabled	Mar 14, 2018 10:14:39 AM	Mar 14, 2018 10:14:39 AM	Select
6	Gear Left Menu Block	gear-left-menu-block	All Store Views	Enabled	Mar 14, 2018 10:14:39 AM	Mar 14, 2018 10:14:39 AM	Select

Enter the *Custom Success Page: Success* settings and you will find the same options to edit that are available for any other default Magento block.

Custom Success Page: Success ← Back Delete Block Reset Save and Continue Edit Save Block

You can edit Custom Success Page: Success block with WYSIWYG-editor or just with HTML-code

Show / Hide Editor

Thank you Your order # is `{{var increment_id}}` Continue Shopping

Path: div/blocks-promo » a » span.content bg-white » span.info

There you will also find the `{{var increment_id}}` variable which stands for the order ID number.

Custom Success Page: Success ← Back Delete Block

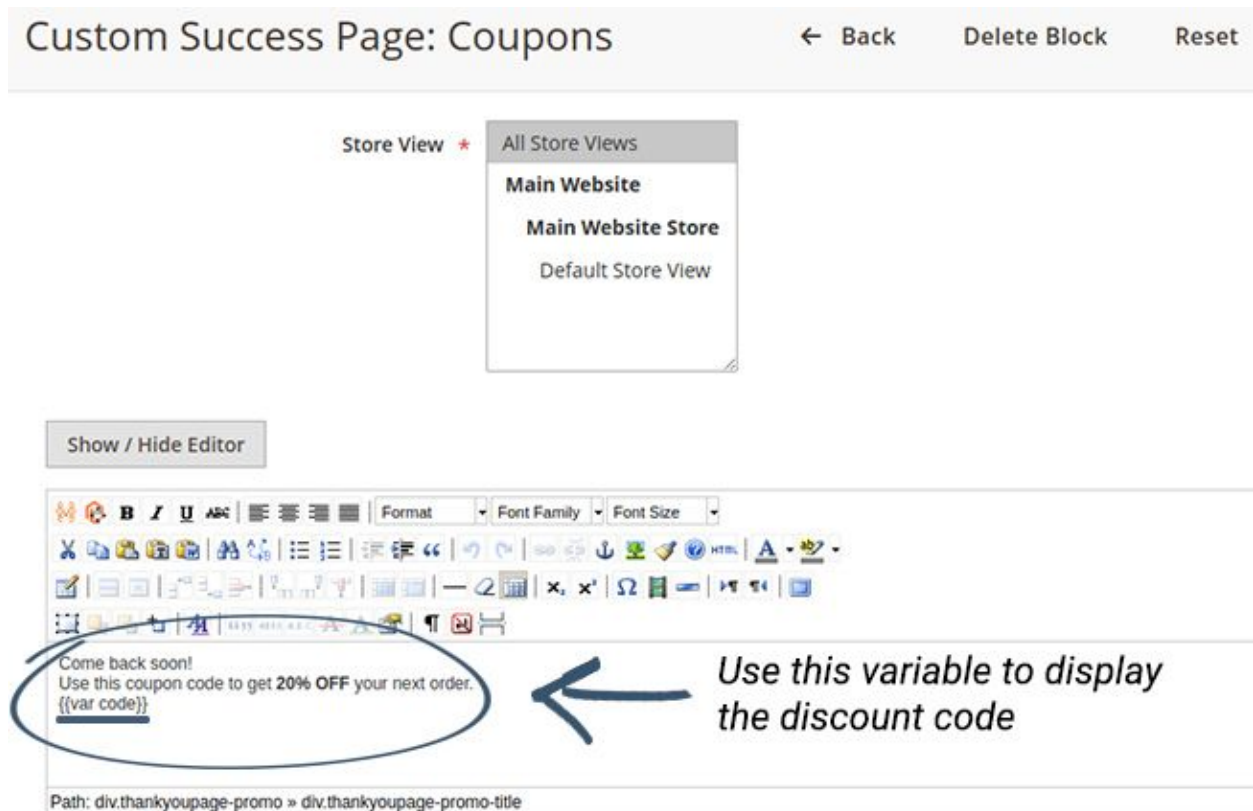

Show / Hide Editor Insert Widget... Insert Image... Insert Variable...

```
<div class="blocks-promo"><a class="block-promo home-main" href="#"> 
<span class="content bg-white"> <span class="info">Thank you</span> <strong
class="title">Your order # is code </strong> <span class="action more
button">Continue Shopping</span> </span> </a></div>
```

Use this variable to display order increment ID number

When editing the *Custom Success Page: Success* block you need to place the `{{var increment_id}}` variable in any place on the page where you wish to display the order ID.

The **Custom Success Page: Coupons** block uses the `{{var code}}` variable to display the discount code.

Custom Success Page: Coupons

Come back soon!
Use this coupon code to get 20% OFF your next order.
{{var code}}

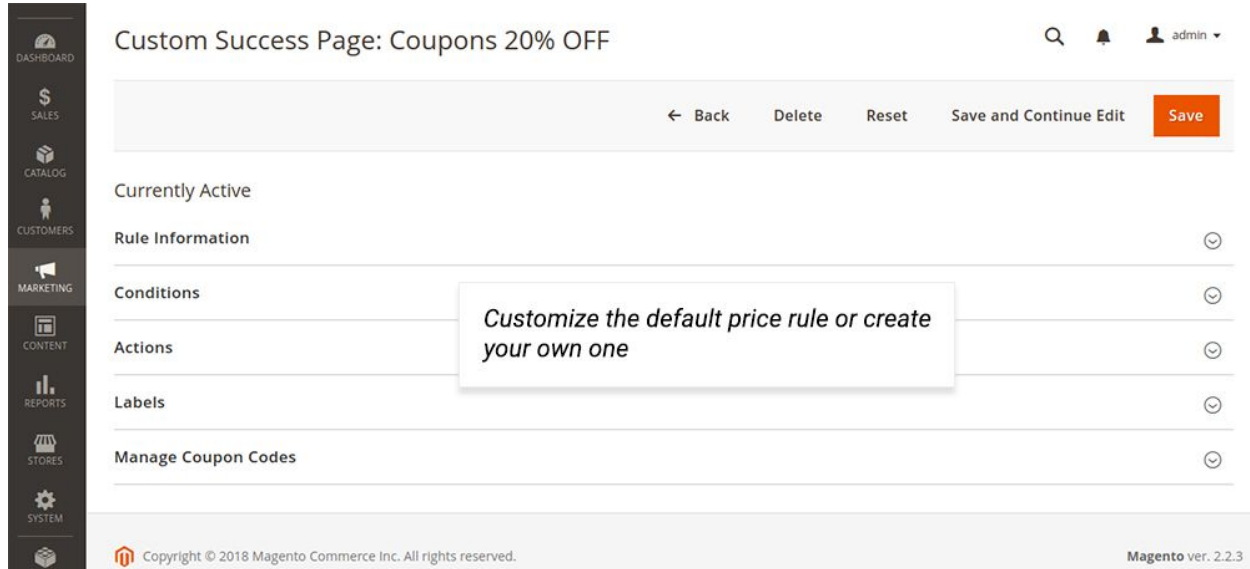

← Use this variable to display the discount code

Path: div.thankyoupage-promo » div.thankyoupage-promo-title

Put the variable in any place on the page where you wish to display the special discount code for your customers. Add any additional text or media to make the page more customer-friendly.

How to customize shopping cart price rule

Cart price rule is created automatically. In order to change it navigate to **Marketing → Cart Price Rules** and select **Custom Success Page: Coupons 20% OFF**.

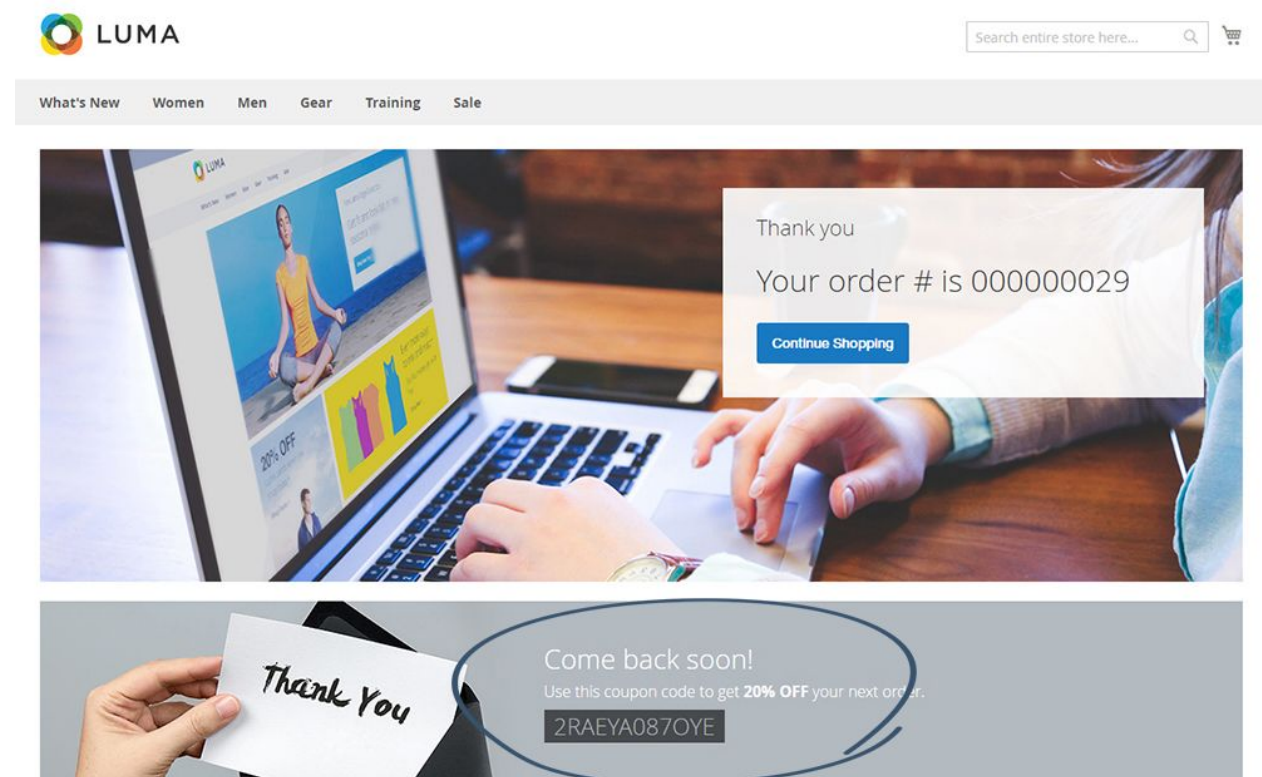

In the **Cart Price Rules** section you can create your own **Cart Price Rules** as well.

That is all! Once you are done with the settings, click **Save** and go to the frontend to see how your success page looks like.

3. How to Use

As soon as you install and configure the module, your default success page will be upgraded with a new look and several new blocks will appear.

First off, the page is decorated with the customizable static block that can display any information you wish. Additional coupon block offers customers a special discount or any other type of deal that you may specify and edit in the module settings.
