1. Introduction to Improved Thank You Page

The module extends features of a default Thank You Page. You can easily add a block with a coupon for the next purchase, place a video or picture with 'Thank you!' message, provide information about related goods. It makes the page more helpful for customers, increases their satisfaction of the purchase and enhances loyalty.

Little page changes lead to great sales!

Key features

- Display blocks with related products.
- Static blocks customization with coupons, special offers, and discounts.
- WYSIWYG and HTML-editors for both convenient and advanced blocks management.
- Auto creation of price rules and discount code generation.
- Special variables to display order number and discount code.
- All necessary static blocks are created automatically.
- Full access to handling default Magento success page blocks.

The module provides you with the possibility to customize the success page, display special offers and related products blocks — all on one page with just a few mouse clicks.

With this Magento extension you won't need to contact a developer each time it is required to customize the success page of your website. Every change is feasible using WYSIWYG-editor meaning you can edit the success page of your website as easy as you edit text and add images in MS Office

2. How to Install Improved Thank You Page Extension

Magento 2 provides a convenient way to manually install a module via composer. In case you got an extension from a provider like a zip-file, follow [this instruction](#).

Further run the following commands:

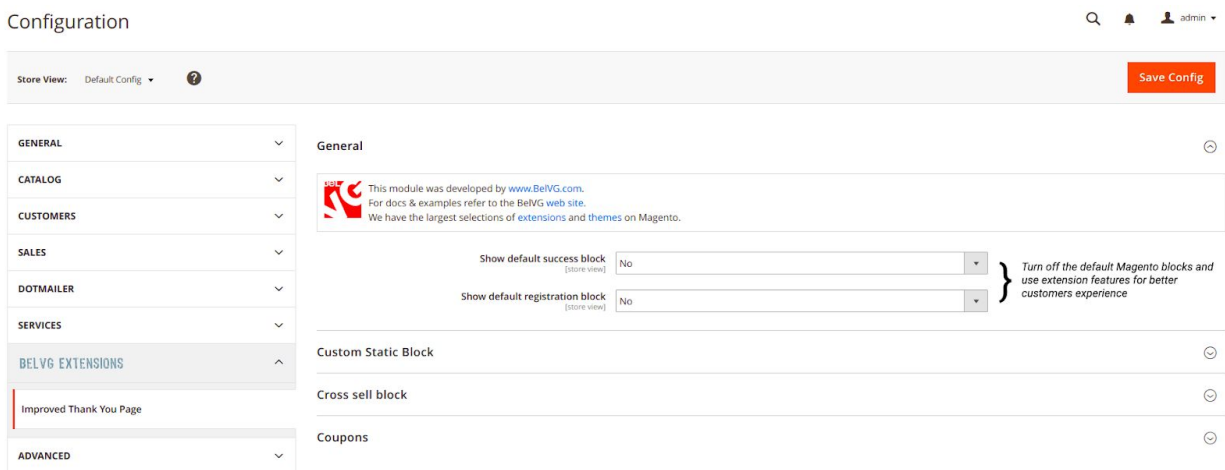

1. Enable module with `php bin/magento module:enable BelVG_ThankYouPage`
2. Run `php bin/magento setup:upgrade`
3. Recompile DI `php bin/magento setup:di:compile`
4. Recompile static files: `php bin/magento setup:static-content:deploy`
5. Flush cache `php bin/magento cache:flush`

3. How to Configure

Note: The extension has been developed and tested only on the Luma and blank Magento themes, so the setting descriptions and screenshots provided in this manual may differ from those you may see if using some custom theme.

Log into the Magento 2 admin panel and switch to **Stores → Configuration**. Under BELVG EXTENSIONS find and enter the **Improved Thank You Page** settings.

You will find the list of options that let you configure and customize the success page to your liking. The first two options are default Magento settings which you have in a store by default.

The Improved Thank You Page extension adds the following options to your admin panel:

- **Show custom static block:** select Yes to display your custom static block on the success page instead of the Magento default one.
- **Custom static blocks:** in the dropdown list select the name of the block you wish to display on the success page.

Custom Static Block

Show custom static block [store view]

Custom static block [store view]

Please select cms block (use {{increment_id}} to display order number in content block)

- **Show cross sell block:** select Yes to display the block with related products on the success page.

Cross sell block

Show cross sell block [store view] Yes

- **Show coupons:** enable this option if you wish to offer customers a special deal or discount.
- **Cart rules for auto-generated coupon codes:** select the type of the rule that will automatically generate coupons for your customers.
- **Custom coupon static block:** select the type of the coupon to be displayed on the success page.

Coupons

Custom coupon static block [store view] Improved Thank You Page: Coupons
Select cms block (use **{{coupon}}**) to display coupon code in content block

How to Customize Static Blocks

The Thank You Page module comes with two predefined static blocks: Improved Thank You Page: Success and Improved Thank You Page: Coupons.

You are able to customize and edit these default static blocks or create new ones just to your liking.

To customize a predefined block, switch to the **Content → Blocks** section. In the list of your static blocks you will find the newly added blocks: Improved Thank You Page: Success and Improved Thank You Page: Coupons

Coupons

[store view] Yes

[store view] Improved Thank You Page: Coupons 20% OFF
Select cart rule to generate coupon codes

[store view] Improved Thank You Page: Coupons
Select cms block (use {{coupon}} to display coupon code in content block)

Enter the Improved Thank You Page: Success settings and you will find the same options to edit that are available for any other default Magento block.

In the **Cart Price Rules** section you can create your own **Cart Price Rules** as well.

That is all! Once you are done with the settings, click **Save** and go to the frontend to see how your success page looks like.

4. How to Use

As soon as you install and configure the module, your default success page will be upgraded with a new look and several new blocks will appear.

First off, the page is decorated with the customizable static block that can display any information you wish. Additional coupon block offers customers a special discount or any other type of deal that you may specify and edit in the module settings.

The image shows a screenshot of the LUMA website's 'Thank you' page. The top navigation bar includes the LUMA logo, a search bar, and a shopping cart icon. Below the navigation bar, there are menu items: What's New, Women, Men, Gear, Training, and Sale. The main content area displays a large 'Thank you for your purchase!' message. Below this, there is a white box with the text 'Thank you' and 'Your order # is 000000003', along with a blue 'Continue Shopping' button. At the bottom, there is a grey box with a hand holding a card that says 'Thank You Page'. To the right, there is a coupon code '9MAQE2TY62QN' and a blue arrow pointing to it. The text 'Come back soon!' and 'Use this coupon code to get 20% OFF your next order.' is also visible. A small note at the bottom right says 'Make your Thank You page more customer-friendly. Add a coupon for the next purchase'.

And finally, an additional block with related products can help you bring the customers back to shop to make new purchases!
