1. Introduction to Product Tabs

Product Tabs is a Magento 2 extension to create and configure custom tabs on product pages. Default Magento tabs are pretty limited and do not offer many ways for customization. The Product Tabs module offers you to control tab content customization with a few simple clicks.

Key features

- Create new tabs either for all products or for some separate products in your web-store;
- Two layouts available: simple tabs or accordion layout;
- New tabs can be created as content blocks of different types: simple html content block, product description, product reviews, related products etc.;
- Sorting order allows setting the position of each tab relative to other tabs.

2. How to Install Product Tabs Extension

Magento 2 provides a convenient way to manually install a module via composer. In case you got an extension from a provider like a zip-file, follow [this instruction](#).

Further run the following commands:

1. Enable module with `php bin/magento module:enable BelVG_ProductTabs`
2. Run `php bin/magento setup:upgrade`
3. Recompile DI `php bin/magento setup:di:compile`
4. Recompile static files: `php bin/magento setup:static-content:deploy`
5. Flush cache `php bin/magento cache:flush`

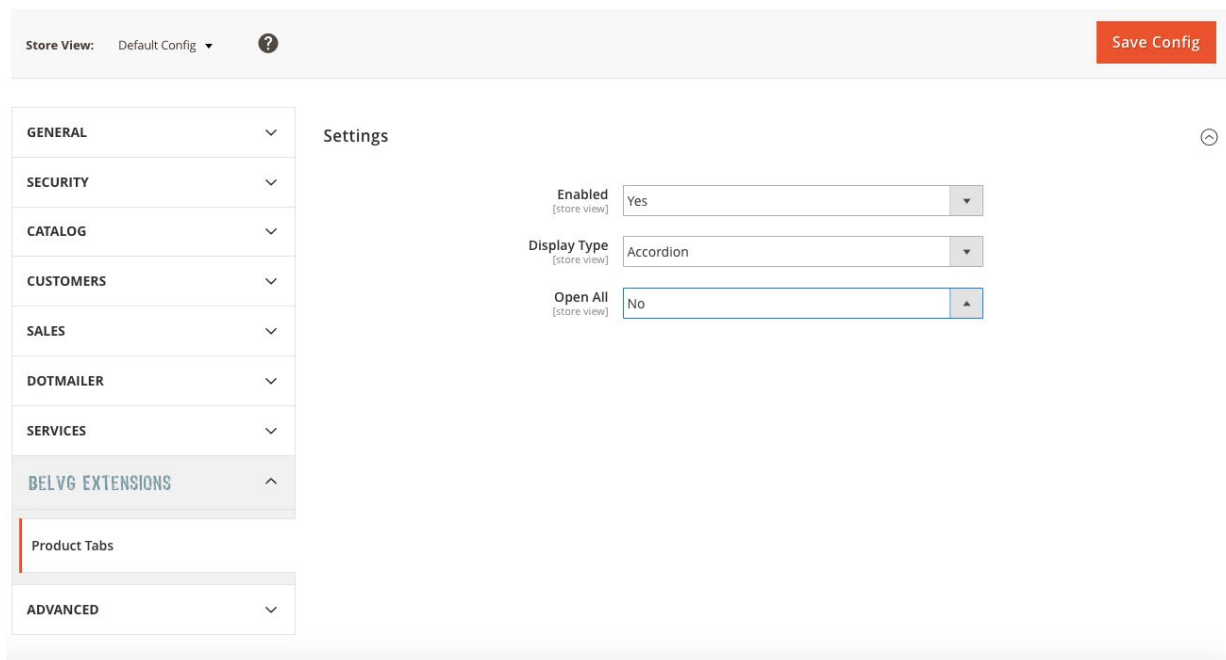

3. How to Configure

Setting up module's general settings

To activate the module log into the Magento admin panel and navigate to **Stores -> Configuration -> BelVG Extensions -> Product Tabs**.

General settings will include the following options to configure:

- **Enabled:** select **YES** to switch the module on.
- **Display Type:** choose the preferred layout for product tabs - either as accordion or as simple tabs.
- **Open All:** this tab appears in case the accordion type of layout is selected in the **Display Type** option. In this setting you may choose whether all accordion tabs should be open or closed by default.

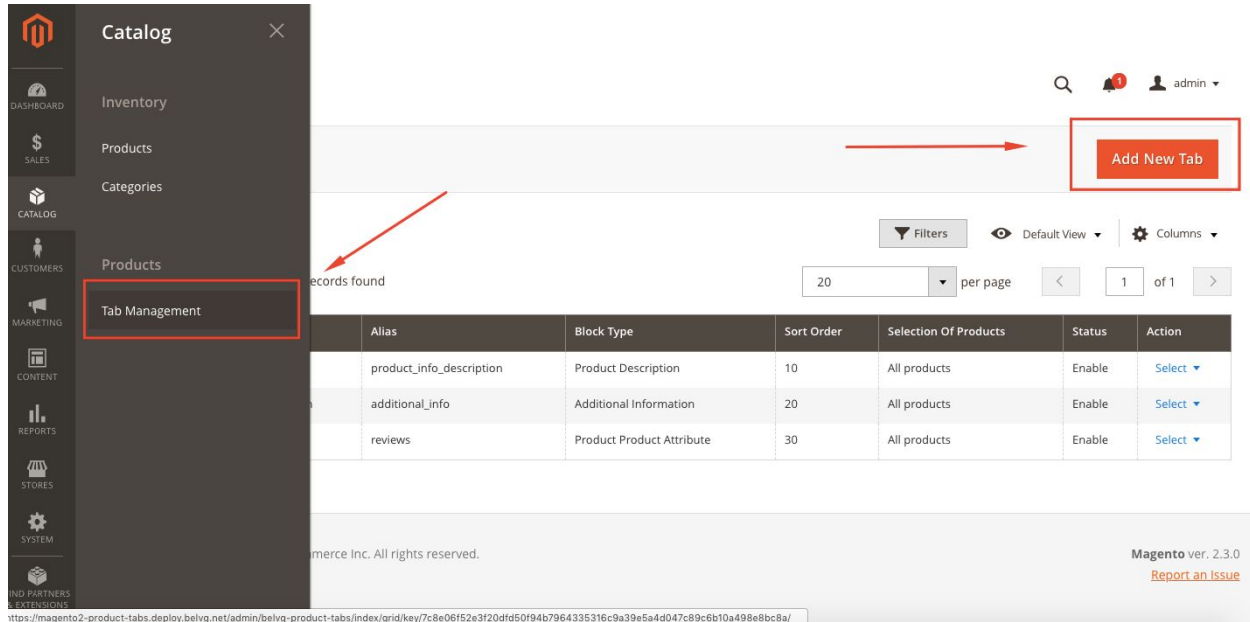

The screenshot shows the Magento admin panel configuration interface. At the top, it displays 'Store View: Default Config' and a 'Save Config' button. On the left, a sidebar menu lists various configuration categories: GENERAL, SECURITY, CATALOG, CUSTOMERS, SALES, DOTMAILER, SERVICES, BELVG EXTENSIONS (highlighted), Product Tabs, and ADVANCED. The main content area is titled 'Settings' and contains three configuration options:

- Enabled** [store view]: A dropdown menu set to 'Yes'.
- Display Type** [store view]: A dropdown menu set to 'Accordion'.
- Open All** [store view]: A dropdown menu set to 'No'.

Creating new tabs for all products

Go to **Catalog -> Tab Management** menu -> click **Add New Tab**.

The screenshot shows the Magento 2 admin interface. On the left, the 'Catalog' sidebar menu is open, with 'Tab Management' highlighted under the 'Products' section. In the main content area, the 'Add New Tab' button is highlighted with a red box. A red arrow points from the 'Add New Tab' button to the 'Tab Management' menu item. Another red arrow points from the 'Add New Tab' button to the 'Add New Tab' button itself. The main content area also shows a table with columns: Alias, Block Type, Sort Order, Selection Of Products, Status, and Action. The table contains three rows of data.

Alias	Block Type	Sort Order	Selection Of Products	Status	Action
product_info_description	Product Description	10	All products	Enable	Select
additional_info	Additional Information	20	All products	Enable	Select
reviews	Product Product Attribute	30	All products	Enable	Select

This will open the **Tab Settings** menu where you need to set up your new tab:

- **Enable:** select **YES** to enable the new tab.
- **Title:** give a name to the new tab. This name will be applied on the frontend.
- **Alias:** here you can specify any id that will be applied for this new block in HTML markup.
- **Block type:** use the dropdown menu to select the type of block that will be applied for the new tab.
- **Sort order:** specify the position of the tab relative to other tabs. Use simple numbers to set the position: the tab with the higher number takes next position to the tab with lower number.
- **Store View:** select the type of the store view where the new tab will be available.

Excluded Products ↻

Products

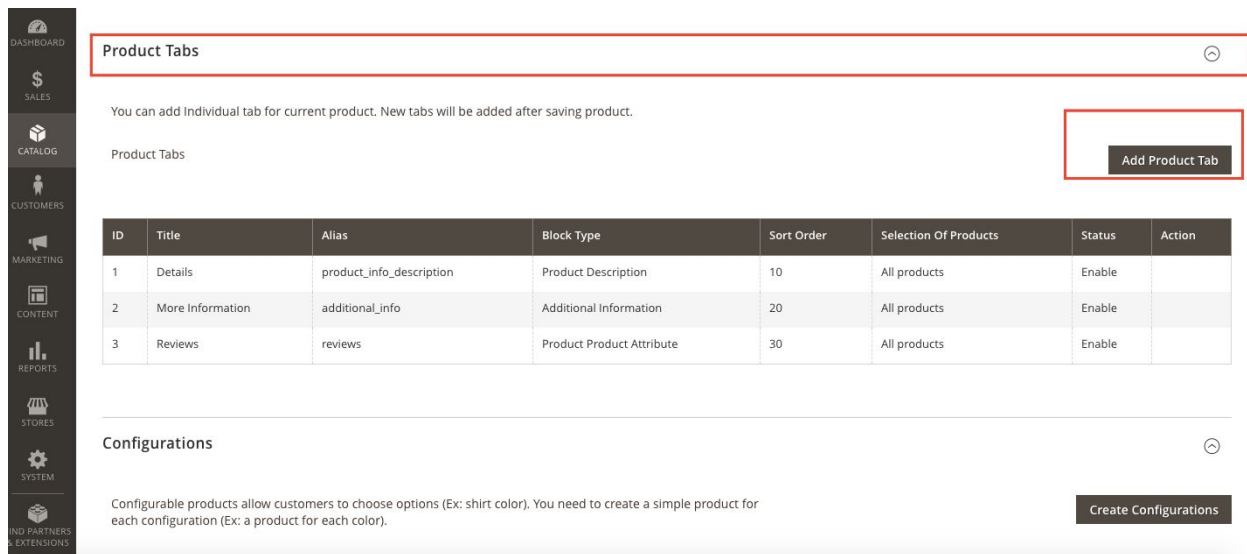

Excluded Products

Add Excluded Product

After you are done with the settings click **SAVE** to create your first tab.

Creating new tabs for a separate product

The second way lets you create new product tabs only for specific products. Switch to **Catalog -> Products** menu and click to edit the product that you want to add new tabs to. Then scroll down through the list of product settings until you find the **Product Tabs** option.

Product Tabs

You can add Individual tab for current product. New tabs will be added after saving product.

Product Tabs

ID	Title	Alias	Block Type	Sort Order	Selection Of Products	Status	Action
1	Details	product_info_description	Product Description	10	All products	Enable	
2	More Information	additional_info	Additional Information	20	All products	Enable	
3	Reviews	reviews	Product Product Attribute	30	All products	Enable	

Add Product Tab

Configurations

Configurable products allow customers to choose options (Ex: shirt color). You need to create a simple product for each configuration (Ex: a product for each color).

Create Configurations

Click **Ad Product Tab** to create a new tab for that product. The list of tab settings is the same as used when creating new tabs for all products. Once finished with the settings click the **SAVE TAB** button to create a new tab for that product.

3. How to Use

New product tabs can be displayed in two main layouts:

Simple tabs
