INTRODUCTION

GUEST WISHLIST

It is an extension for Magento 2 that can help you improve your conversion stats by providing guest visitors an opportunity to add items to the wishlist without logging in or creating an account. While the default Magento functionality allows only signed up users to add products to their wishlist.

With this module, users can add and remove products from the wish list even if they leave the webstore and then return back later – their wish list will still be available, because the extension allows the cookie lifetime to be set from 30 days and longer.

If a user decides to log in or register – the module merges the wish lists, and all the items that have been added under the guest session will be transmitted to the main user's account.

KEY FEATURES

- Guest users are able to add products to the wishlist
- The Ajax technology allows adding items to the wishlist without reloading the main page
- Items from the wishlist can be added to the shopping cart or be removed
- The last 3 items added to a wishlist are displayed on the left sidebar on all pages
- Module creates a separate page to manage the wishlist
- Guest wishlist is automatically merged once a user logs in or registers an account
- The guest wish list is saved when the user leaves the site. They can open their wish list again until the cookies are deleted. The administrator can set the period when the cookies get deleted.

INSTALLATION

IN CASE YOU DOWNLOADED THE EXTENSION AS A ZIP-FILE,
FOLLOW THIS INSTRUCTION.

Unzip the module archive

Upload files to the server using the path `app/code/BeIVG/GuestWishlist`

Enable module with `php bin/magento module:enable BeIVG_GuestWishlist`

Run `php bin/magento setup:upgrade`

Recompile DI `php bin/magento setup:di:compile`

Recompile static files: `php bin/magento setup:static-content:deploy`

CONFIGURATION

MODULE'S GENERAL SETTINGS

Note: The extension has been developed and tested only on the Luma and blank Magento themes, so the setting descriptions and screenshots provided in this manual may differ from those you may see if using some custom theme.

Log into your admin panel and navigate to **Stores -> Configuration -> BeIVG Extensions -> Guest Wishlist.**

GENERAL SETTINGS WILL INCLUDE THE FOLLOWING OPTIONS TO CONFIGURE:

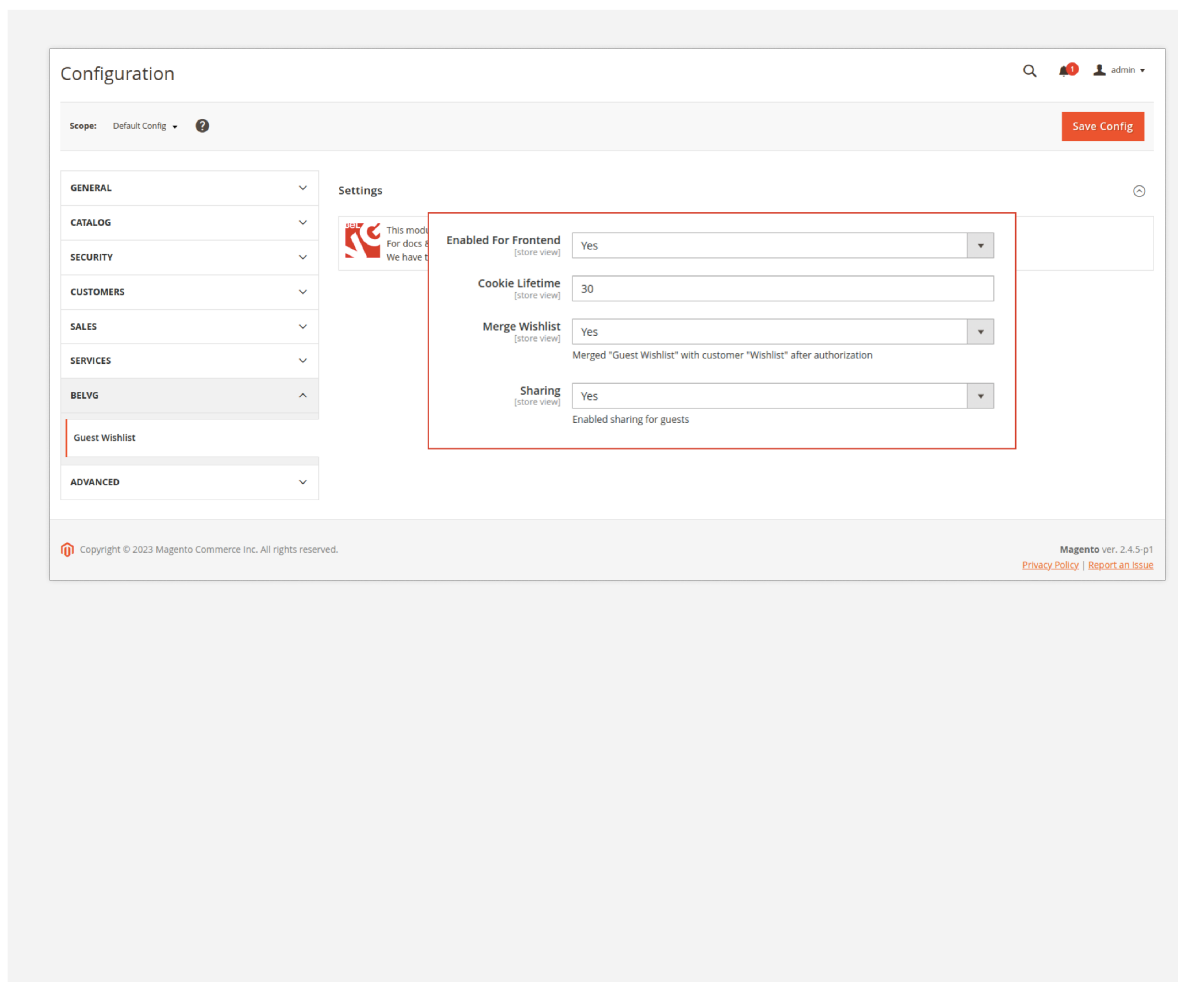

Enable for Front end: select **YES** to switch the module on.

Cookie Lifetime: specify the lifetime period of cookie files. The period is equivalent to the time when users can enter their guest wishlists. Once expired the cookies are automatically deleted along with their wishlists.

Merge Wishlist: select **Yes** to merge wishlists after the guest users get registered or signed into their accounts.

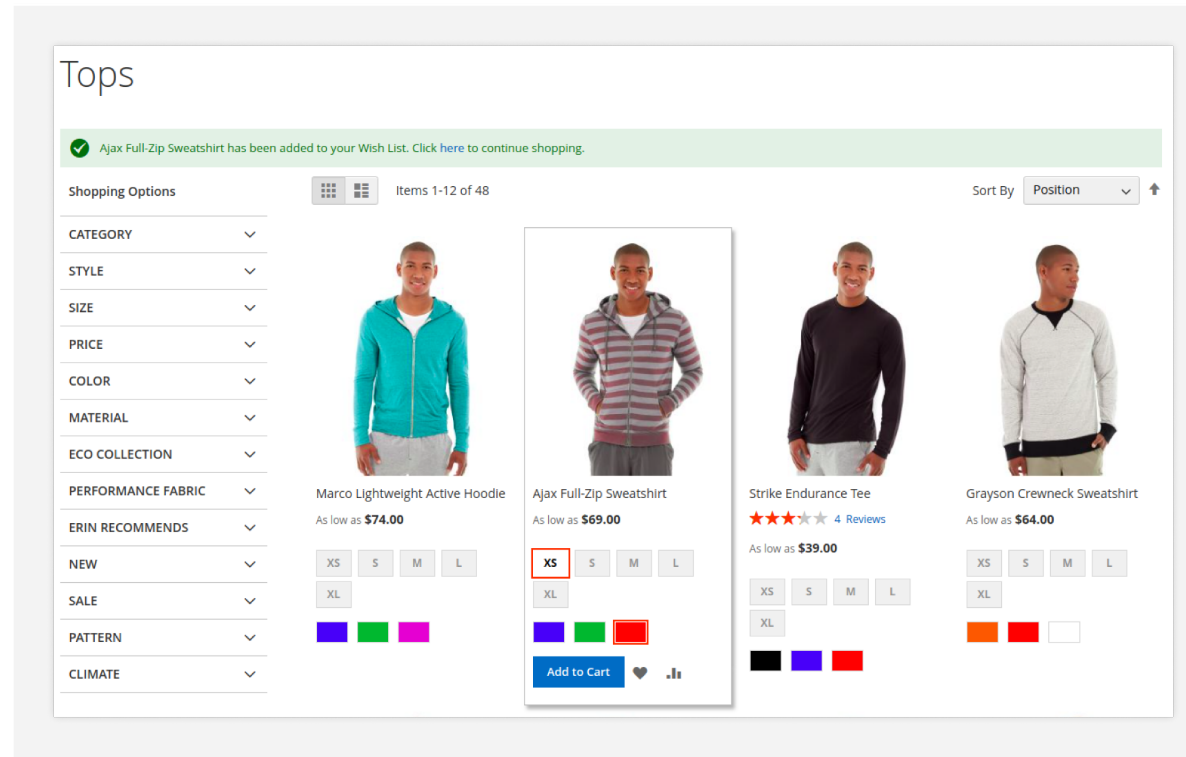

Sharing: choose Yes to give your quest users an opportunity to share their wishlist.

CLICK THE **SAVE CONFIG BUTTON TO APPLY THE CHANGES.**

FRONTEND OVERVIEW

HOW THE MODULE WORKS ON THE FRONTEND

Overview on the category page

After the extension is enabled all unregistered users can create their wishlists and use them without creating accounts on your store.

Items are added to the wishlist without reloading the main page and the mark appears if the product have already been added to the wishlist.

Wishlist Page and Popup

You can see the wish list on the popup when clicking on My Wish List at the top right or by opening a wishlist page.

The module creates this **separate page** to manage the wishlist. Users can review the list of items and either add them to the shopping cart or remove them one by one or all at once.

ENJOY USING THE MODULE !
